

Warranty for Maxeon PV Modules / SPR-MAX, SPR-E, SPR-X and COM

This Limited Warranty is effective for Maxeon Solar photovoltaic modules for commercial installation with SPR-MAX, SPR-E or SPR-X and COM in the product model number and sold after July 1, 2020. Maxeon Solar photovoltaic modules which include AC in the model number are covered by a different warranty.

1. Limited Warranty

Subject at all times to the terms and conditions as set out in this Limited Warranty, Maxeon Solar Pte. Ltd (“Maxeon Solar”) warrants that for 25 years beginning on the Warranty Start Date¹ (the “Warranty Period”), its photovoltaic modules specified above, (“PV Module(s)”), shall be free from defects in materials and workmanship under normal application, installation, use and service conditions, and the power of the PV Modules will be at least 98% of the Minimum Peak Power² rating for the first year, and will decline by no more than 0.25% per year for the following 24 years, so the power output at the end of the final year of the 25th year warranty period will be at least 92% of the Minimum Peak Power rating (the “Guaranteed Peak Power” rating).

2. Claims Process and Coverage

If any PV Module fails to conform to this Limited Warranty and provided that any loss in power is determined by Maxeon Solar (in its sole discretion) not to have resulted from one of the excluded events set forth in Section 4 below, then for the Warranty Period, Maxeon Solar will repair, replace or refund the defective PV Modules as set forth herein.

In the event you have a claim covered by this Limited Warranty, immediately notify (a) an Authorised Maxeon Solar Installer; or (b) contact Maxeon Solar directly at the contacts shown below. Upon receipt of a claim, Maxeon Solar may require additional information regarding the claim, which may include, without limitation, applicable warranty registration information, proof of purchase and/or delivery, installation, serial and model numbers, and evidence regarding the basis of claim. All Maxeon Solar warranty obligations hereunder are expressly contingent upon the timely and full provision of such additional information. The return of any PV Modules will not be accepted unless prior written authorisation has been given by Maxeon Solar.

For any valid claim, Maxeon Solar will, in its sole discretion, either: (a) repair; (b) replace; or (c) refund the original purchase price subject to the conditions set out herein. In the event Maxeon Solar elects to repair or replace the affected PV Modules, Maxeon Solar will pay for: (i) reasonable and customary transportation costs for the return of the PV Modules from the place where the affected PV Modules were delivered by Maxeon Solar, and; (ii) reasonable and customary transportation costs for reshipment of any repaired or replaced PV Modules to the place where the affected PV Modules were delivered by Maxeon Solar; (iii) for a PV Module that was originally installed in Australia by Maxeon Solar, any affiliate of Maxeon Solar, or any Maxeon Solar Authorised Installer, Maxeon Solar will pay for reasonable, necessary, and actual removal and reinstallation costs of the repaired or replaced PV Module up to AUD\$375 for up to 5 PV Modules and AUD\$75 per PV Module thereafter for a single claim; provided, however, Maxeon Solar has sole discretion to select the party performing such removal and reinstallation.

In the event Maxeon Solar elects to replace any PV Module, Maxeon Solar will replace such PV Module with an electrically and mechanically compatible PV Module (including a refurbished or remanufactured PV Module) with a substantially equal or greater power rating. For any refund, Maxeon Solar may either refund the original purchase price, or refund the amount equal to the original purchase price multiplied by the difference between the Guaranteed Peak Power percentage and the actual power output percentage; provided, however, the original purchase price shall be prorated at 4.75% per year starting five years after the Warranty Start Date.

3. General Conditions for Warranty Claims

- a) All warranty claims must be filed within the Warranty Period. Any claim filed outside the Warranty Period, including any claim for a latent or undiscovered defect, is invalid.

² “Minimum Peak Power” is defined as the minimum rated power, as shown on the label. Peak Power is defined as the watt peak at Standard Test Conditions (1000W/m² irradiance, AM1.5, 25C. SOMS current, LACCS FF and Voltage from NREL calibration), as described in IEC61215, measured per IEC60904, and accounting for 3% measurement tolerance. Maxeon Solar modules shall, in any event, require a sweep rate of no less than 200ms to ensure an accurate power measurement. Maxeon Solar can provide a detailed testing procedure or a list of recognized testing agencies upon request.
