2. Customer Support, Claims Process and Coverage

Immediately contact Maxeon at customers@maxeon.com for a claim covered by this Limited Warranty. Maxeon may require additional information to validate the claim, including: applicable warranty registration information; itemized proof of purchase, delivery or installation information; serial and model numbers; and evidence regarding the basis of claim. All Maxeon obligations hereunder are expressly contingent upon the timely and full provision of such additional information that is reasonably required to validate the claim. Claims subject to the exclusions set forth in Section 4 will be rejected. Returned Products will not be accepted unless prior written authorization has been provided by Maxeon.

For a validated claim made during the applicable Warranty Term, Maxeon will either repair, replace, or refund the covered Products. Subject to Applicable Law, Maxeon has sole discretion in determining repair, replacement, or refund for each claim. For repairs and replacements, Maxeon will pay reasonable, customary transportation costs for the return of covered Products from, and the shipment of repaired or replacement Products to the place where the covered Products were originally delivered by Maxeon. Replacement Products may be refurbished or remanufactured, will be electrically and mechanically compatible with the covered Products, and will have a substantially equal or greater power and performance ratings.

¹ Guaranteed Capacity is a percentage of the Usable Capacity listed on the Product specification sheet for the specified and limited combinations of Throughput Energy limit and Operational Temperature Range. Measured Capacity is a percentage of the Usable Capacity, measured at ambient temperature of 25°C to 28°C under the Maxeon Charge/Discharge Testing Procedure (provided upon request). Testing must be performed by a technician authorized by Maxeon. Throughput Energy is the running total of AC energy output of a Product starting on the Warranty Start Date.

For Products originally installed in Australia by Maxeon or an installer who is certified or authorized by Maxeon, in any case who is properly trained and certified to install and commission the Products in accordance with Applicable Law and relevant professional and regulatory standards, including CEC accreditation, Maxeon will pay reasonable, necessary, and actual removal and reinstallation service costs of repaired or replaced Products, up to AU\$150; provided, (a) Maxeon has sole, reasonable discretion to select the service provider performing such services, and (b) Maxeon will pay the service provider for such service costs.

If Maxeon issues a refund under a valid Product or Performance Warranty claim, then Maxeon will refund the original purchase price for the first two (2) years of the applicable Warranty Term, and then linearly depreciate the refund amount by 11% per year (the “Claim Value”), provided that for a valid Performance Warranty claim, Maxeon will refund the Claim Value multiplied by the percentage difference between the Guaranteed Capacity and the Measured Capacity (both as a percentage of Usable Capacity). If the original purchase price cannot be substantiated, then Maxeon will use the current market value to determine the Claim Value.
